

Alu-Cab™

THE ULTIMATE ALUMINIUM CANOPY

BUILT TOUGH!

At Alu-Cab, we pride ourselves on bringing the best possible product to the market.

The Alu-Cab Drawer System

Alu-Cab produces a range of some of the best drawers available in the 4x4 and commercial market. Unlike most other drawer systems available on the market, ours is built from Aluminium.

Using aluminium for our drawers creates a drawer that is light, strong and durable.

Our drawers run on individual sealed bearings that are built to withstand large weight, dust, water and any of the harsh conditions African travellers have to throw at them.

Our tops are built using 12mm waterproof ply. These are covered with nylon carpet that is very durable for loading equipment on top of the drawers.

We have installed at the rear of the drawers spring bolts that allow one to be able to easily remove the draws should one wish to wash them or transfer them to your bush kitchen.

There are self-latching heavy duty stainless steel catches on the drawers which are easy to use and lockable should you need to keep your valuables safe.

Optional extra's available for the drawers:

- Surround carpeted decking to close off the sides and front with drop hatches.
- Drawer dividers to keep your items in place.
- Flip out gas stove for easy use.
- Drop-down Fridge Slide.

Specs:

Short :	750mm(L) X1000mm(W) X280MM(H)	34kg
